Mountain Weather Forecast

Brecon Beacons National Park

Forecast valid from 00:00 on Monday 25 Jul 2022 until 23:59 on Tuesday 26 Jul 2022

Forecast Issued on Sunday 24 Jul 2022 at 14:10

Confidence: High confidence for the unsettled weather to give way to an improvement next week. The main uncertainty relates to the position of a waving front as it clear south Sunday night and thus how much rain and low cloud affects the Brecon Beacons.

Headline for Monday 25 Jul 2022: Rather cloudy with chance of showers.

Mountain weather hazards on Monday 25 Jul 2022

Blizzards No Likelihood	**Heavy persistent snow** No Likelihood	**Storm force winds** No Likelihood
Gales No Likelihood	**Severe chill effect** No Likelihood	**Poor visibility** Medium Likelihood
Thunderstorms Low Likelihood	**Heavy persistent rain** No Likelihood	**Strong sunlight** Medium Likelihood

Precipitation probability							
40%	40%	40%	40%	60%	30%	20%	10%

Forecast for Monday 25 Jul 2022

Weather: Rather cloudy across the Brecon Beacons with scattered showers, some of these locally heavy during the early hours of the morning. Showers easing somewhat during the morning, however outbreaks of drizzle and light rain may affect some windward up slopes at times. The cloud breaking from early afternoon with any showers becoming few and far between. A bright and dry end to the day with decent clear spells developing across the region.

Chance of cloud-free hill tops above 600m: 30-40% rising to 75% from mid-afternoon.

Low cloud and visibility: Broken cloud with bases mostly above 500-600 metres, however cloud bases dropping towards 400m, especially in association with rain. Cloud bases will tend to lift above the level of summits from early afternoon as the cloud breaks up more readily. Good visibility outside of cloud and rain, with distant hills fairly reliably visible by the end of the day.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Intermittent cloud cover with bases dropping close to or below summits during the morning will lead to navigational challenges at times. Given the occasional showers, surfaces will also prove wet so appropriate footwear will be needed.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sun 24 Jul 2022	8.6mm	8.6mm	9.6mm

Forecast for Tuesday 26 Jul 2022

Weather: A dry but cloudy start Tuesday with a risk of some showery outbreaks of rain and drizzle sinking south across the Brecon Beacons during the morning. Mostly dry with long sunny spells during the afternoon.

Maximum wind: Northerly 10-15 mph with isolated gusts to 20 mph

Chance of cloud-free hill tops above 600m: 70%

Low cloud and visibility: Rather cloudy areas of cloud with bases from 500-600ft during the morning, limiting visibilities on some of the highest summits at times. Cloud bases lifting during from late morning. Visibilities below cloud generally very good, however occasional showers leading to temporary reductions at times.

Temperature: **Valleys:** Plus 11 Celsius becoming plus 21 Celsius.
At 600m: Plus 8 Celsius becoming plus 12 Celsius.
Freezing level: Well above the summits.
